### WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/US2004/037182

IAPZORSZÓPSIFIU 12 MAY 2006

		TO THE LAND TO THE LIMIT AND THE LAND
_	Box	No. I Basis of the opinion
1.		regard to the <b>language</b> , this opinion has been established on the basis of the international application in anguage in which it was filed, unless otherwise indicated under this item.
	1	This opinion has been established on the basis of a translation from the original language into the following language , which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).
2.		regard to any nucleotide and/or amino acid sequence disclosed in the international application and ssary to the claimed invention, this opinion has been established on the basis of:
	a. ty	pe of material:
		a sequence listing
		table(s) related to the sequence listing
	b. fo	rmat of material:
		in written format
	. $\square$	in computer readable form
	c. tin	ne of filing/furnishing:
		contained in the international application as filed.
		filed together with the international application in computer readable form.
		furnished subsequently to this Authority for the purposes of search.
3.	!	In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
4.	Addi	tional comments:

### WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/US2004/037182

Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability						
The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non obvious), or to be industrially applicable have not been examined in respect of:						
□ t	the entire international application,					
⊠ c	claims Nos. 17-22,26-28					
becau	use:					
⊠ tl	the said international application, or the said claims Nos. 17-22,28 relate to the following subject matter which does not require an international preliminary examination (specify):					
s	see separate sheet					
	the description, claims or drawings (indicate particular elements below) or said claims Nos. 26-28 are so unclear that no meaningful opinion could be formed (specify):					
s	see separate sheet					
	the claims, or said claims Nos. are so inadequately supported by the description that no meaningful opinion could be formed.					
□ n	no international search report has been established for the whole application or for said claims Nos					
□ ti	the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the Administrative Instructions in that:					
ţi	he written form		has not been furnished .			
			does not comply with the standard			
ti	he computer readable form		has not been furnished			
			does not comply with the standard			
	the tables related to the nucleotide and/or amino acid sequence listing, if in computer readable form only, do not comply with the technical requirements provided for in Annex C-bis of the Administrative Instructions.					
	See separate sheet for further o	tetail	ds			

Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

## WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY (SEPARATE SHEET)

PCT/US2004/037182

#### Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

- 1. For the assessment of the present claims 17-22 on the question whether they are industrially applicable, no unified criteria exist in the PCT Contracting States. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognize as industrially applicable the subject-matter of claims to the use of a compound in medical treatment, but may allow, however, claims to a known compound for first use in medical treatment and the use of such a compound for the manufacture of a medicament for a new medical treatment.
- 2. Claims 26-28 are considered to be so lacking in clarity that no opinion can be given on these claims (Art. 6 PCT). The reason is that these claims contain no technical features but refer rather in a general fashion to the description. Therefore no examination as to novelty or inventive step of these claims has been performed.

#### Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

- 3. The compounds CC-11 to CC-17 and CC-27 to CC-44 as well as the last compound of claim 7 and the compound of claim 9 are considered not to fall under the definition of claim 1 (Art. 6 PCT) since in these instances the substituent R<sub>OB</sub> is 2-ethyl-2hydroxybutyl, which is not one of the substituents present for R<sub>OB</sub>.
- 4. Reference is made to the following document:

D1 = US-A-6218430

5. The document D1 is regarded as being the closest prior art to the subject-matter of claim 1, and discloses the use of compounds having a basic bisphenylmethane structure to be useful as vitamin D<sub>3</sub> mimetic.

- 6. The presently claimed compounds differ especially in the choice of the substituents R<sub>OB</sub> in which an OH group is present on a tertiary carbon atom. As such the presently claimed subject-matter can be considered to satisfy the requirements of Art. 33 (2) PCT with respect to D1.
- 7. The problem to be solved by the present invention may therefore be regarded as providing alternative compounds for use as vitamin D<sub>3</sub> mimetic.
- 8. The solution proposed in claim 1 of the present application can be considered as involving an inventive step (Article 33(3) PCT) for the following reasons. In the document D1 compounds are disclosed in which the group corresponding to R<sub>OB</sub> of the present application has a hydroxy group on a secondary carbon atom. There is no indication in the prior art from which the skilled man could have expected that such compounds would also display the desired D<sub>3</sub>-mimetic properties. The compounds of claim 1 are considered to present none obvious alternatives to the compounds known from D1.
- 9. The same reasoning applies, mutatis mutandis, to the subject-matter of the corresponding independent claims 3-9 (which are in fact claims towards preferred compounds according to claim 1), which therefore are also considered to satisfy the requirements of Art. 33 (2) and 33 (3) PCT.
- 10. Claims 2 and 10-11 are dependent on claim 1 and can, therefore, also be considered to satisfy Art. 33 (29 and (3) PCT.
- 11. Claims 12-16 are claims towards (pharmaceutical) compositions and claims 23-23 are compounds for use a medicaments comprising a compound according to claim 1. As such these claims can also be considered to satisfy Art. 33 (2) and (3) PCT.
